Electronic Security System (ESS) CCTV, Access Control, and Intrusion Detection

SSU provides proven design, installation, repair and maintenance support for Electronic Security Systems (ESS). We will deliver the experts and expertise needed to perform ESS services for the most demanding and sensitive government customers. Our trained professionals and cleared personnel are experts at working with CCTV, Intrusion Detection, Access Control, Biometrics, and Perimeter Surveillance systems in conditions ranging from urban to austere.

CAPABILITIES

- Custom designed systems tailored to customer requirements
- Cutting edge Video and Audio surveillance systems for critical facilities both CONUS and OCONUS
- Provide personnel, infrastructure, and intelligence to improve overall system efficiency and effectiveness
- Past performance installing, repairing, and maintaining surveillance systems for customers across the Department of Defense and Department of Homeland Security including:
 - Upgrading existing sites with newer technology
 - Installing systems at new sites/locations
- The Thermal Radar Intelligence 360 Thermal Camera provides intelligent high definition infrared surveillance for challenging or remote sites.
- Hydra Ultra, an innovation from Thermal Imaging Radar combines real-time 360° intrusion detection directly integrated with a straight visual PTZ.

SYSTEM SPECIFICATIONS

- Commercially available equipment, systems are non-proprietary, allowing the customer to retrofit systems for future upgrades
 - Indoor/Outdoor Pan Tilt Zoom (PTZ)
 - Color Cameras
 - Thermal Infrared Detection Video Cameras
 - Remotely controlled, monitoring and recording
 - Day/Night Capable
- Covert and Overt, catered to individual customer requirements
- Processing, Exploitation, and Dissemination (PED) at clients' location of choice, controlled by the client or end user(s)

UNIQUE CHARACTERISTICS

- Open system architecture
- Competitive pricing for the best technology by leveraging our extensive relationships
- Deployable kit for expeditionary requirements
- Experience with both U.S. and overseas installations
